

Communication Unites Everyone

A NEW MODEL OF DELIVERING STREAMING SERVICES

We can deliver virtually every piece of digital video content that exists in the world at remarkably low prices.

This has never been done before.

FULLY OPERATIONAL

CUE Streaming is not a concept or an idea.

We are operational with customers enjoying the platform now!

There are tens of thousands of customers using our advanced modem product at this time.

Thousands of channels, plus the creation of new channels and networks running on the CUE Streaming platform.

U.S. MARKET SIZE

212 Million people in the U.S. get their video content from streaming services.

The video streaming industry is a \$321 Billion industry and growing at 20.7% a year.

CUE Streaming allows **ANY** consumer to access **ANY** video content **ANYWHERE** in the world.

‘This Changes Everything!’

CONCEPT VALIDATION

“The consumption of digital media is experiencing explosive growth around the globe.”

Even though the market is huge, it is still growing by over 26% a year.”

Pew Research July 2022

And consumers are looking for ways to have more access with lower costs.

THE PROBLEMS

With ever-increasing numbers of digital offerings, keeping track of it all is a confusing and very expensive task. The burden of “stacking” is very expensive to consumers.

There is no easy path for an organization or entrepreneur who wants to build their customized channel to have a platform where they can organize, build and broadcast content.

THE SOLUTION

A one-stop, easy-to-navigate source of all the providers.

The user gets ALL the subscriptions they need in one low-cost, high-value platform.

No need to get add-ons like Netflix, NFL, Golf and HBO.

All the digital content in the world, in one easy-to-use package at one low price.

THE GO-TO-MARKET PLAN

- Automated text-based marketing
- Specialty advertising
- A.I. applied to social media
- Rapid training and deployment of salespeople
